

NESTLE RANGING POLES, WOOD

MODEL NO. 11000000....

MIT DEN BESTEN MESSEN

WOODEN RANGING POLES

- All ranging poles are „Made in Germany“ .
- The ranging poles are fitted with a solid steel tip which is required in survey work.
- We only use high class wood (Ø 28mm) for manufacturing our ranging poles.
- PVC-coated.
- For various applications our ranging poles are available with different tips.
- Round tips for grassy, sandy or forest soil.
- Triangular tips for stony ground.
- Ranging poles with special trinagle design can be easily transported in bundles of 6 pcs.
- Ranging poles are available in normal red or daylight luminous red. Luminous red is especially for field survey, because it is better visible.

APPLICATIONS

For aligning and marking.

Ranging poles are indispensable accessory for any kind of survey work e.g. for marking boundary stones in order to find the optimal position for placing the total station.
